Task 2: Microservices Architecture and Deployment

4.

a. Configuring the React Storefront to operate on port 3009.

The React storefront couldn't be opened as the server could not make any connection at port 3000. Also, in the docker-compose.yml file the front-end services, volume, networks, and ports were missing and could not change the ports as mentioned in the assignment pdf.

b. Configuring the Saleor Dashboard on port 9003.

The Saleor Dashboard was assigned and is accessible on port 9003.
